

Welcome to the **Pathology Pillar** Update

Michael Roehrl (Memorial Sloan Kettering Cancer Center, New York) and
Ed Nice (Monash University, Melbourne)

Pathology Pillar Update 2021

- New pathology pillar chair (Michael Roehrl, Memorial Sloan Kettering Cancer Center) and co-chair (Ed Nice, Monash University, Melbourne)
- **HPP Day today:** Dr. Tom Montine (Chair of Pathology, Stanford) as guest keynote speaker – *“Translating Proteomics to the Clinical Arena”*
- **HUPO Reconnect 2021 Pathology Session** on November 15 (all invited!): *“Precision Pathology: Proteomics for Patients”*
- Helping launch the **HPP Grand Project** (*“A Function for Every Protein”*) with direct medical relevance: Pathology – protein networks of disease, disease classification, risk stratification, measure disease dynamics, treatment response monitoring, and resistance to therapeutic intervention

Upcoming:

- **Outreach** to pathology and medical communities in US/Canada (United States and Canadian Academy of Pathologists, USCAP) and Australia (Royal College of Pathologists of Australasia, RCPA)
- Joint proteomics workshop with RCPA in 2022
- Collaboration with the Australian Peptide Conference: *“The Omics Revolution: Towards Personalized Medicine”* (May 2022)
- Engage and partner with **diagnostics companies and pharma**
- Build **resources for the diagnostics community** (proteomics specimen biobanks, clinical proteomics protocols, proteomics training programs for physicians/residents, etc.)
